Technology Business Review

Judy Construction Co

February 13, 2026

Your technology. No surprises.

SECURITY INCIDENTS	PATCH COMPLIANCE	DEVICES NEEDING REPLACEMENT	LINGERING TICKETS (30+ DAYS)
None pending	**100%**	**10**	**2**

Operational Readiness

Are day-to-day operations running smoothly?

✓ No unresolved security incidents

2 incident(s) detected in 6 months, 2 resolved

⚠ 3 device(s) lack antivirus protection

⚠ 15 user(s) not enrolled in security training

✓ Phishing click rate: 0% (below industry avg)

⚠ 2 request(s) open 30+ days

85 total requests in 6 months

Infrastructure & Capacity

Is the hardware ready for what's ahead?

40 devices managed (17 Win Laptop, 21 Win Desktop, 2 Server)

⚠ 10 device(s) aging out or past end of life

DESKTOP-BU73VGS (~6yr), ANOBLE-PC (~8yr), KATRINA-2022 (~5yr), DESKTOP-9V1QHU4 (~8yr), JUDY-DT-2022 (~5yr), DESKTOP-4VJUCVK (~8yr), DESKTOP-4FO2SB1 (~8yr), LMCILVAIN-PC (~8yr), DESKTOP-J71F7Q7 (~8yr), DESKTOP-MBHMUHQ (~6yr)

⚠ 10 device(s) running unsupported OS

DESKTOP-BU73VGS (Windows 11 Professional Edition), ANOBLE-PC (Windows 11 Professional Edition), KATRINA-2022 (Windows 11 Professional Edition), DESKTOP-9V1QHU4 (Windows 11 Professional Edition), JUDY-DT-2022 (Windows 11 Professional Edition), DESKTOP-4VJUCVK (Windows 11 Professional Edition), DESKTOP-4FO2SB1 (Windows 11 Professional Edition), LMCILVAIN-PC (Windows 11 Professional Edition), DESKTOP-J71F7Q7 (Windows 11 Professional Edition), DESKTOP-MBHMUHQ (Windows 11 Professional Edition)

✓ Patch compliance at 100%

Recommended Next Steps

Prioritized actions to keep your environment healthy

Replace 10 Aging Desktop Computers

PLAN FOR

Aging computers mean more downtime when they fail unexpectedly, slower work for your employees, and higher support costs as we spend more time troubleshooting aging hardware. Planning replacements now lets you budget properly and avoid emergency purchases. Replacing these over the next 3-6 months will also ensure your team has reliable equipment as you expand into Nashville and new jobsites.

Complete Security Training for All 51 Users

ACT NOW

One successful phishing attack can shut down your business for days or weeks, lock you out of project files, and

cost tens of thousands in recovery expenses and lost productivity. Getting all employees trained on recognizing threats is your best defense against ransomware and business email compromise scams that target construction firms.

Establish a Standardized Equipment Purchasing Process

PLAN FOR

Coordinating equipment purchases through your IT team saves money through business pricing and better warranties, eliminates last-minute rush situations, and ensures you get machines that are properly configured for your construction management software and network. This becomes especially important as you're expanding operations and support demands are increasing.

Add Local Backup Storage for Faster Recovery

PLAN FOR

If you experience a server failure or ransomware attack, restoring from a local backup takes hours instead of days. For a construction company managing active projects and job costing, every hour of downtime means delayed bids, missed communications with subs and clients, and lost productivity across your team. A local backup system means you can get back to work faster when something goes wrong.
